The Spede-Heat™ 37mm Short Range incorporates an aluminum shell and utilizes black powder as the propellant. The Spede-Heat™ 37mm is designed to deliver one dual-ported chemical or smoke canister from a 37mm launcher 75 yards to the intended target zone.

The Spede-Heat™ 37mm Short Range is most widely used as a crowd management solution. It is used by Law Enforcement and Corrections for the rapid deployment of chemical agent from maximum stand-off distances. Fired from a 37mm launcher, the Spede-Heat™ 37mm Round contains one (1) canister ported on each end.

This round may be fired in the air at an angle of approximately 25 - 30 degrees to achieve maximum stand-off, or it may be skip fired into the target area from closer ranges. When launching, it is recommended to have a spotter to ensure canisters do not land on rooftops or other areas of concern.

The Spede-Heat™ chemical and smoke projectiles are designed for outdoor use and have fire-producing capability. They are not intended for barricade penetration. Do NOT fire directly at personnel, as serious injury or death may result.
