The 12-Gauge Muzzle Blast Rounds incorporate a translucent shell and utilize smokeless powder as the propellant. The 12-Gauge Muzzle Blast Rounds are designed to deliver chemical agents in the immediate area (10 feet) of the grenadier.

The 12-Gauge Muzzle Blast Rounds are widely used as a crowd management solution for the immediate and close deployment of chemical agent. However, it has proven successful during tactical operations.

As a pain compliance round for crowd management, the 12-Gauge Muzzle Blast Rounds are an excellent device for deploying chemical laden powder at close ranges for indoor or outdoor operations. The 12-Gauge Muzzle Blast provides instantaneous emission of chemical agent directly at or on riotous, non-compliant subjects close to the police line or within confined spaces.

As a tactical round, the Muzzle Blast Rounds have been used in operations such as barricaded subjects, room clearing, space denial, and a means of contaminating crawl spaces and attics. The purpose of the Muzzle Blast Rounds is to minimize the risks to all parties through pain compliance, temporary discomfort, and/or incapacitation of potentially violent or dangerous subjects.

It is recommended that the grenadier and all team personnel in the immediate vicinity of deployment utilize protective masks.
