37MM LAUNCHING CARTRIDGE

PRODUCT SPECIFICATIONS	
Diameter	1.50 in / 37 mm
Length	2.00 in / 5.08 cm
Part No.	1270
Warranty	5 years from date of manufacture

ALL SPECIFICATIONS ARE AVERAGES AND SUBJECT TO CHANGE

The 1270, 37mm Launching Cartridge is a primed aluminum shell that is used for propelling grenades when using the 1365 and 1390 Launching Cups. The 1270 37mm Launching Cartridge utilizes black powder as the propellant.

The 1365, 37mm Grenade Launching Cup provides the operator with the ability of projecting the Triple-Chaser® family of grenades.

The 1390, 37mm Grenade Launching Cup provides the operator with the ability of projecting the Spede-Heat™, Riot Control, Saf-Smoke™, Colored Smoke, and Maximum Smoke family of grenades.

The use of the Launching Cups will project the grenades further than can be hand delivered. This increases the distance between operators and crowds, reducing the chance for injuries to both parties.

 **WARNING**

This product can expose you to chemicals including Lead Salts and Hexavalent Chromium, which are known to the State of California to cause cancer, and Lead Salts, which are known to the State of California to cause birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

WARNING: TO BE USED BY TRAINED LAW ENFORCEMENT, CORRECTIONAL OR MILITARY PERSONNEL WHO HAVE SUCCESSFULLY COMPLETED A TRAINING PROGRAM FOR THE DEPLOYMENT OF CHEMICAL MUNITIONS. IMPROPER USE OF THE CHEMICAL MUNITIONS CAN RESULT IN DEATH OR SERIOUS BODILY INJURY.
