

37MM WOOD BATON BLACK POWDER ROUND

**DEFENSE
TECHNOLOGY®**

PRODUCT SPECIFICATIONS	
Diameter	1.50 in / 37 mm
Length	8.00 in / 20.3 cm
Projectile Count	5
Velocity	280 fps / 85 mps
Minimum Safe Range	40 ft / 12.2 m skip fired
Maximum Effective Range	75 ft / 22.9 m skip fired
PROJECTILE SPECIFICATIONS	
Material	Hard Wood
Height	1.35 in / 3.4 cm
Diameter	1.35 in / 3.4 cm
Weight	0.77 oz / 21.6 g
Part No.	1176
Warranty	5 years from date of manufacture
ALL SPECIFICATIONS ARE AVERAGES AND SUBJECT TO CHANGE	
<p>The 37mm Wood Baton incorporates an 8.0-inch casing that contains five (5) wood projectiles. The 37mm Wood Baton utilizes black powder as the propellant.</p> <p>The 37mm Wood Baton Round is most widely used as a crowd management tool by Law Enforcement and Corrections. The 37mm Wood Baton Round is generally deployed in low trajectories or skip fired in the general direction (non-target specific) of the intended targets, administering a means of pain compliance over greater distances than most of its counterparts. It has also been successfully used as a dynamic, high-energy single subject round.</p> <p>The 37mm Wood Baton Round is intended to be skip fired, but may be direct fired at the discretion of the operator; however, depending on the distance and the subject's apparel, serious injury or death may result. When used in either manner, the operator should be adequately trained in the use of Less Lethal Impact Munitions and have a thorough understanding of the round and considerations of selecting shot placement such as level of threat, target distance, size, and clothing.</p> <p>As a pain compliance round for crowd control, it is most suitable at medium to extended ranges of fire, approximately 40 to 75 feet. Inside of 40 feet, this round may result in minor injuries. It is ideal for correctional facilities where multiple impacts from greater stand-off distances may be desired for countering yard disturbances.</p> <p>It differs from its smokeless powder counterpart (37/40mm and 40mm Wood Batons) in that it may be acquired in an 8.0-inch casing that provides the greatest quantity of wood projectiles and that it utilizes black powder as the propellant. Black powder will usually disperse the wood projectiles in wider patterns.</p>
